Request for Proposals: Drainage Maintenance Master Plan

The Fairfield-Suisun Sewer District is seeking proposals from qualified consulting teams to develop a Drainage Maintenance Master Plan for the Cities of Fairfield and Suisun City.

The Master Plan will include consolidation of asset inventories, identification and prioritization of system deficiencies and capital projects, development of a 10-year Capital Improvement Plan, a sustainable financial plan, and updated stormwater standards to meet current regulatory requirements.

The project will be completed in two phases. Phase 1 will focus on data collection, verification, and gap analysis from existing GIS, record drawings, CMMS, and other sources. Phase 2 (future) will include the full Master Plan development. The total budget for both phases is approximately \$650,000, with a desired completion timeline of 16 months from Notice to Proceed (anticipated June 2026).

The full Request for Proposals (RFP) document is available for download using the following link: [Drainage Maintenance Master Plan RFP](#).

Proposal Deadline: 4:00 p.m. on Monday, April 27, 2026
