

ENGINEERING

PLAN IT. DESIGN IT. BUILD IT.

From planning and design to construction, Engineers and technical staff help turn ideas into real projects that keep our wastewater infrastructure reliable, efficient, and ready for today and for the future.

FEATURED ROLE

WASTEWATER ENGINEER

DESIGN. MANAGE PROJECTS. COLLABORATE.

Leads infrastructure capital improvement projects and development review - from planning and design through construction oversight including community engagement.

- Meaningful work that makes a difference
- Full-scope engineering project management
- Competitive pay and excellent benefits
- Collaboration with other departments
- Stable, in-demand career

A DAY ON THE JOB

- Manage capital improvement projects
- Review development plans for new construction
- Oversee design through construction completion
- Present projects to the Board and community

WHY IT'S AMAZING

- Shapes infrastructure the community relies on for decades
- Blends technical skill with creativity
- Strong pay, benefits, and long-term career growth
- Evaluates and supports cost, risk and reliability decisions

PATH IN

- Bachelor's from a ABET-accredited engineering program
- Engineer-in-Training (EIT) certificate after graduating
- Advance to Professional Engineer (PE) license with experience

OTHER ROLES WITHIN ENGINEERING ENGINEERING TECHS AND INSPECTORS

ENGINEERING TECH

Supports engineers on smaller projects with drafting, field measurements, data collection to build real-world experience.

INSPECTOR

Inspects the progress of capital construction projects, ensuring work meets plans and specifications.

TOGETHER, WE DESIGN AND MANAGE PROJECTS FOR THE DISTRICT.

ENGINEERING INTERN

Shadow project managers, document construction progress, and perform small project management and capital project research.
